

LA RICOTTA WORKSHOP PROPOSAL

LA RICOTTA WORKSHOPS can run over a period of 1 or 2 weeks. They are discussion-driven with the aim of stimulating interaction and collaboration among the participants. The maximum number of participants is 25, including the organisers and eventual invited speakers.

LA RICOTTA WORKSHOPS are committed to having a cultural impact on the area where the venue is located. For this reason, at least one of the organisers or invited speakers is required to be a Spanish speaker – that is, fluent enough in Spanish to deliver a public lecture, though not necessarily a native speaker. Furthermore, if there are Spanish-speaking participants, they should be involved in public events. Public events may include outreach seminars on topics related either to the proposed school or to socio-scientific issues – that is topics of social relevance with scientific content –, experiments, hands-on activities, and similar engagements.
